“Our Client Zaxe ,Turkey’s 3D Printer Manufacturer provided \$2 Million Investment”

Zaxe secured a \$2 million investment in a funding round led by PCP Technology Opportunities Fund and Regional Development Fund under Türkiye Development Fund, with participation from existing investors KVK, Omurga Technology Fund, Nevzat Aydın, Ali Demir Akel, and Muzaffer Akpınar.

Zaxe, Turkey’s leading 3D printer manufacturer established in 2015, provides users with an end-to-end 3D ecosystem consisting of hardware, software, and materials.

Zaxe ecosystem combines high-speed printing capabilities, AI based smart technologies, with plug-and-play designs tailored to the rapidly growing global market for additive manufacturing solutions. In addition to its position as the market leader in Turkey, Zaxe exports its products to over 15 countries in Europe and North America.

Zaxe founders Baki Gezgen and Aydonat Atasever said, ‘With this new investment we have received, we aim to become one of the significant players in the global market and continue our vision of making production simpler and faster, independent of traditional manufacturing methods.’

“We congratulate all the groups for their valuable contributions in this process in which we took part as the attorney of Zaxe 3D Printing Technologies, Turkey’s leading 3D printer manufacturer.”
